ASP.NET Core Application Development: Building An Application In Four Sprints (Developer Reference)

Synopsis

Through four complete sprints, this book takes you through every step needed to build brand new cross-platform web apps with ASP.NET Core, and make them available on the Internet. You won't just master Microsoft's revolutionary open source ASP.NET Core technology: you'll learn how to integrate the immense power of MVC, Docker, Azure Web Apps, Visual Studio and Visual Studio Code, C#, JavaScript, TypeScript, and Entity Framework. Â Working through the authors' carefully designed sprints, you'll start with a blank canvas, move through software architecture and design, adjusting to user feedback, recovering from mistakes, builds, testing, deployment, maintenance, refactoring, and more. Along the way, you'll learn techniques for delivering state-of-the-art software to users more rapidly and repeatably than ever before.

Book Information

Series: Developer Reference

Paperback: 432 pages

Publisher: Microsoft Press; 1 edition (December 11, 2016)

Language: English

ISBN-10: 1509304061

ISBN-13: 978-1509304066

Shipping Weight: 1.1 pounds (View shipping rates and policies)
