For a couple of years, I've been making felted articles from thrift store sweaters, based on limited information available in the knitting mags. Finally, a book on this unlimited subject has been published, providing much needed guidance and creative inspiration. Felt It starts with the basics, where to find inexpensive feltable garments and then how to shrink them (the felting process). Actually cutting into one of these sweaters is daunting, but the section on cutting and piecing calms that apprehension. With easy to follow instructions and patterns for 39 projects, ranging from delicate flowers to Christmas stockings to sturdy backpacks, this book can keep the felter busy for months if not longer. A section on needlefelting (by hand and by sewing machine) is included. Felt It! Stitch It! is a Fabulous! resource.

Reading and enjoying the photos of finished projects has inspired me to make use of my wool sweaters that are outdated, moth damaged, and shrunk when mixed accidentally with normal laundry. I enjoy recycling old into new, useful items. With the holidays fast approaching, there are many great ideas for gifts.

I did order and receive *Felt It! Stitch It! Fabulous!: Creative Wearables from Flea Market Finds* and it is filled with fun and innovative ideas that I wish I had thought of. When you use the flea market wools you will get an idea on how wools felt into such a tightly woven fabric that you can treat it like regular material and use regular sewing patterns when cutting out the pieces to be sewn together. Think of the endless possibilities for new sources of exquisite materials. In the above pictures you can see a few of the fun projects presented in this book. We should have everyone we know looking for used wools. What an outstanding book for all of us felters and seamstresses. I know what I will be doing in the near future with my old wools. Kathryn shows you how to dye the wools, felt and block the wools and has all the patterns and instructions for every project in this wonderful book. There are so many projects in this book that we can do with our children too. Kathryn Introduction in the book: My eureka moment came as I was standing heartbroken in the laundry room. It was a scene you can probably relate to: a favorite wool sweater, a busy day, a large wash load, and...out came something fit for a teddy bear. I "was miserable until it suddenly occurred to me that I was holding a lovely piece of felted fabric. Soft, warm material I could cut up and stitch into something new. Within days, I was back in the laundry room purposely shrinking dozens of thrift store wool sweaters and then turning their durable felted fabrics into zillions of great projects. What I'd stumbled upon was a fabulous way to recycle old knits into smart, stylish wearable's and accessories. With a few unloved wool sweaters, a washer and dryer, and some basic sewing skills, you, too, can start with ready-made knits and end up "with hats, wraps, purses, and more, all created with a loving, handcrafted touch. The trick is in the magic of felting. Because felted knits don't unravel, they can be cut into any shape and sewn easily by hand or machine. And felted knits are so warm and soft that they're wonderfully touchable and perfect for countless projects. Felted knits are very popular now, but the conventional way to make a felted item, such as a purse, is to knit a very large loose one and shrink it. This tends to be both time-consuming and (since wool yarn can be pricey) expensive. The approach I'll teach you is easy on the piggy bank, as it relies on back-of-the-closet or thrift store finds, and it's fast. If you're like me, you love the look of handcrafted knits and you take great pleasure in giving gifts you've created yourself rather than bought at the mall. But even if you have the knitting skills required, the magic ingredient that knitting

requires, time, and can be elusive. Every project in this book has that "hand-knit-with-love" look but can be completed in one afternoon. Take a look at the Basics chapter first, and you'll learn how to do on purpose what you once did by accident (shrink sweaters). I'll show you how to cut the new fabric up into perfect fabric pieces, and we'll take a quick look at the very simple sewing skills you'll need to complete the projects in the book. All of the projects can be sewn by hand, though in many instances you can use a sewing machine for even more time-saving power. Then, I'll introduce you to ways to enhance your creations with needle felting and powdered drink-mix dyeing. I have lots of tips and tricks I've learned from years as a designer and fabric artist to share with you. And if you do knit, I'll show you how to combine knitting with fast felting to add an exciting new dimension to your work. The 39 projects in this book range from a simple flower to embellish a favorite hat to a shoulder pack I've carried on trails and in trendy restaurants. Because you'll be finding your own knits to shrink, cut, and stitch, your creations will automatically be unique. And in no time you'll be able to take what you've learned here and dream up your own fabulous felted treasures. Hurry, what are you waiting for? Go over to [Amazon](#) and pick up this beautiful hard covered book at a good price and while you are there get the Nordic Felted knits, next on my review list and this way you will get the free shipping with your twenty five dollar purchase.

Very clever ideas for using old wool garments that are felted in the washing machine. The projects are upscale style wise and not hokey or crafty. The photos are beautiful. I was inspired by what I read and saw here. I would certainly recommend this book for anyone interested in this process.

This is the greatest book. I would highly recommend it to whomever wants an easy way to make felted items. Very easy to follow. Great ideas!!

Here is a review of my new book from Booklist. I am so thrilled that they were so pleased with it and I hope you will be also! Bieber, Katheryn Tidwell. Felt It! Stitch It! Fabulous! Creative Wearables from Flea Market Finds. May 2007. 128p. illus. index. Sterling/Lark/Chapelle, \$24.95 (1-60059-067-5). 746. This is not a knitting book, although it looks like one. Using a technique she calls "fast felting," the author turns old, discarded sweaters found at flea markets, thrift stores, or even the back of the closet into clothes and accessories that look handmade. And at first glance, you would think this was just another felted knitting book. The projects are contemporary, creative, and stylish. The process--shrinking old sweaters to create felted materials--saves both time and money, for quick results. Bieber covers every aspect of the process, from finding appropriate feltable garments to

arranging the pattern pieces to maximize the details of the felted materials. The author assumes some basic sewing experience, but the projects can be completed using either a sewing machine or by hand. Most helpful are the sections on finding the correct sweater and photographs illustrating the before and after of different types of knits so readers can see what kind of results to expect. The projects have strong appeal to knitters and sewers as well as the reuse, recycle, and repurpose craft movement. --Jennifer Palmer

I bought a bunch of felting books recommended by different sources. This one popped up in the search when I went looking for the others. I bought it for the wrap on the cover. I'm finding myself using it for the stitches and the look it offers the projects. It lists pretty much the same info the others do, but I like the finish it puts on the projects it contains.
