Introducing Adobe Premiere Elements 10: Learn By Video

Synopsis

This focused workshop provides over 3 hours of high-quality video training on editing your own personal videos in Adobe® Premiere Elements® 10. Video expert and trainer Maxim Jago starts by introducing you to the Premiere Elements workspace and explaining how to bring video files into the program. Next, you'll learn how to assemble your video clips into great-looking movies complete with titles, transitions, and special effects. Maxim will also show you some of the new features in Premiere Elements 10, like the Cartoon Effect filter and techniques for sweetening audio. Finally, you'll learn how to share your movies with friends and family on DVDs or the Web. The lessons are wrapped in a feature-rich interface that lets you jump to any topic and bookmark individual sections for later review. Full-Screen mode provides a hi-def, immersive experience, and Watch-and-Work mode shrinks the video into a small window so you can play the videos alongside your application. As with all titles in the Learn by Video series, the project files used in the lessons are included with the course, and interactive review questions help reinforce what you've learned.

Customer Reviews

Great product to get you going in a rather complicated program. It is a big help if you are new to editing.

Adobe Premiere Elements 10: Learn by Video is an excellent tutorial complement to Adobe Premiere Elements 10. With it you will be able, in a short time, to learn how to make beautiful and interesting productions with transitions, titles, music and narratives, and sharing them through YouTube and other sharing media. I highly recommend this tutorial program. Introducing Adobe Premiere Elements 10: Learn by Video 1st (first) edition

The videos are very good for a rank beginner who has no interest in anything fancy, but a lot of possibilities in Premiere Elements are skipped.

I prefer watching how someone performs a task rather than reading a book. This video got me up and running within a few hours. Premiere Elements 10 has more options than Apple's iMovie and before you know it, you will be creating award-winning videos! I highly recommend this video.

I have been using older version adobe Premiere elements and the software worked very well. So I felt very good to update the software and I also needed a training DVD to understand and learn about the new software from Adobe..

Better training DVDs out there. My opinion! The disc is a little confusing, lacks interest, side steps too much to get to the point. For years my favorite training disc are Total Training of course in cost a few dollars more but well worth it.

Really helps in using Photoshop Premiere Elements. This video makes a very nice learning package combination with the book, "The Muvipix.com Guide to Adobe Premiere Elements 10"

I found the software very useful on learning how to use this product. I like being able to jump around to the topics. That arrested me so easily.
