Color Coded EZ Tabs For The 2011 National Electrical Code

COLOR CODED
EZ TABS™
for the
2011 National Electrical Code®
DELMAR
CENGAGE Learning

- Complete set of tabs are compatible with the NEC® 2011 softbound, spiral bound, looseleaf or handbook
- Color-coded, adhesive tabs make it easy to locate important information
- Durable material is designed to withstand the wear and tear that accompanies regular usage
- Clearly labeled sections saves valuable time when looking for must-have information on the job

Peel and Stick in Two Easy Steps:

1. Turn to the first page of the index. Slowly remove tab from sheet and place at the bottom of the page, with the black vertical line at the edge of the page.
2. Turn to Annex D and repeat the procedure by aligning the lower horizontal line of the "Annex" tab with the top horizontal line of the "Index" tab. Repeat the procedure with each tab until you reach the top of the book, then start again at the bottom with the second row.

Remember, tabs hold fast on first contact with the page.

Synopsis

Navigating the NEC 2011 has been made easier than ever with these updated self-adhesive tabs. The NEC 2011 tabs are a unique offering that provide the perfect tool for organizing the code's various sections. Students can place the durable tabs onto the edges of their code, turning it into a reference guide with information at their fingertips. With such easy to access information, students will find themselves spending less time searching for the information they need and more time understanding it. Affordable and time-saving, they are a must-have for NEC users.

Customer Reviews

Makes it easy to find what your looking for, faster then always having to go to the index.FYI, to the makers of this product: 406 & 406.4 are on the same page. Also the 310.15's are in the wrong order.

Overall nice but since the "traditional" method is to start with the last one at the bottom so you can easily work your way backwards and get the tabs aligned... why does 310.15(B)(16) show up BEFORE (as printed) 310.15(B)(2)(a) and 310.15(B)(3)(c)? I already put those two tabs in place then found out this tab goes LATER in the book. It's a trivial thing, yes, but when I'm spending this much time and effort I'd like to avoid setbacks. Another thing, one of the biggest purchasers is students who are referencing all over the book during school. Please print the labels on BOTH SIDES. If I'm way back on Chapter 9, I'd like to be able to identify which tab is for 414 without

having to close the book or flip about unnecessarily.

There are two tabs that are out of order for Ch 3 tables. At least one tab for each article and appendix should be the standard. The tabs should be double sided for when your in the middle of the book and want to flip back to a previous tab. Otherwise the tabs are awesome.

Makes searching thru your code book easier. I do wish that the labels were printed front and back for easier searching

I bought these tabs because tabbing my 2011 NEC book had been recommended to me by co-workers and by the folks on engineerboards.com as a very useful tool for the PE. I initially didn't see the point in tabbing pages of a book when the book already has a table of contents and an index, but I was wrong. The tabs made locating sections of the book much easier both during my preparation for the exam and the exam itself. I think some of the tabs are unnecessary - I don't know what convention you follow when tabbing a book, but I ended up with some pages having multiple tabs. I don't think anyone should take the Power PE exam without some form of tabs in their code book.

I bough these out of a general desire to organize myself and ended up loving them. The Tabs make it easy for me to find particular CODE CHAPTERS and articles without extensive searching. The color coding is nice, the black writing on them very readable, and the particular code articles chosen for the tags are generally where I would want them to be. Good purchase.

These tabs are needed for anyone that desires to study and use the the 2008 or 2011 National electric code book, this book is the bible for many types of electricians, planning and installing electrical circuits by code these tabs get you to the article needed to figure cost and time information on a circuit installation, also these tabs keep you in time with the various electrical test that are taken to advance in this field.

Amazing tabs! Helps me find subjects in the code book faster! and easy to install! Very simple! All you got to do is payh attention to what the tab says and work back wards ! Installing is very simple! After installing the tabs are amazing tool to search the code book faster!
