Customer Reviews

I agree with "Bit of a disappointment". There is a lot of things in the book that a person would never spend the time to make, and if he did it would be completely useless. There were however 2 projects that were really nice. The sheepskin slippers were adorable, and I think doable. But the other leather briefcase I would love to try and make, but it would be impossible to try and make it with the sketchy instructions they left. To make this bag you would have to already have skills that way. It was disappointing, because the purpose of purchasing a how to book, is to follow their instructions to be able to make the bag. Also even if you could figure it out, they left miniature patterns in the back. They neither told you any percentages to be able to blow up the pattern, or any written out dimensions on the bag, or any other pattern for that matter. So if your good at guessing what size those mini patterns are, great. Don't waste your money, glad I checked it out of the library first. I gave it 2 stars instead of 1 only because of the slippers. I think I could use my own feet as a pattern.

Bunny egg cozies, Wall pockets. A teapot cosy and a child's vest are some of the projects covered

in this book. As I stated in another review of another book. If you want to make things to sell on sites like etsy than this is the book for you. If you'd like to construct durable "usable" items. Might want to skip it
