# Clicking With Your Dog: Step-By-Step In Pictures (Karen Pryor Clicker Books)

## Synopsis

"Clicking with Your Dog" is the answer for all pet owners who want a dog to be a real partner and friend. The author's step-by-step illustrations explain the clicking process more clearly than ever before. Soon you will truly understand your dog, and, thanks to the clicker, your dog will understand you!"

## Book Information

ISBN-10: 189094808X

ISBN-13: 978-1890948085

Product Dimensions: 7.5 x 0.5 x 8.5 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars [See all reviews](#) (116 customer reviews)

Best Sellers Rank: #38,348 in Books (See Top 100 in Books) #84 in [Books > Crafts, Hobbies & Home > Pets & Animal Care > Dogs > Training](#)

## Customer Reviews

When I wrote the first review on this book in May 2001, I had been using this book for a month or so and was suitably impressed. I was also just beginning to invest in clicker training. 9 months on (many books later), and having trained (or at least partially trained ... \*grin\*) 3 dogs, I'm no longer as convinced that newer operant training methods have as distinct an advantage over classical/traditional methods, as some writers would have us believe. We are discovering that all training methods (including the clicker method) have their respective strengths & weaknesses. What many writers don't say is that much depends on the dog itself or that combination training methods work well too. But that being said ... the clicker is still the most effective way I have discovered of informing my dogs when an action is approved ... its quick, extremely simple & precise ... one click and the dog knows that it has done right ... no buts, no ifs - that's it! Depending on time, mood and disposition, voice commands can vary in tone and quality - the clicker is consistency paramount. When used properly, the clicker is one heck of a communication tool ... and this book's value is that it teaches a beginner very quickly how and when to sound the clicker ... This is a book consisting primarily of drawn illustrations ... very few words ... And they say a picture is worth a

thousand words - therein lies the secret and effectiveness of this book ... the illustrations are as precise and clear to the reader as the sound of the clicker is to the doggie ... The pictures convey in quite a remarkable manner - a clarity of timing to the reader that might otherwise have been lost had words been used ...

The ideal training guide for everyone; especially those who don't have time or interest to sit down and pour through long blocks of text, or highly technical writing. Tillman's clear, concise, easy-to-follow illustrations make comprehension a snap, for every type of learner. This is the book my students find the easiest to follow, and it's absolutely marvelous for children. Feedback from dog training students I mentor worldwide consistently note that the book's presentation style makes it impossible to put down. Because each chapter can be read individually, those who like to "skip around" instead of reading from beginning to end will still find it simple to follow the step-by-step directions. The pictures are clutter-free, elegant and simple, helping the reader focus easily on the behavior being shown. One example of its effectiveness is how accessible it is for those with learning disabilities. My husband, severely dyslexic, cannot read blocks of text without great difficulty. Yet, I was able to randomly open the book, give him a clicker and treats, and watch him "shape" the behavior just by following the illustrations. He didn't need to read any of the accompanying text (which is concise, without a wasted word) in order to get the behavior from the dog. Students with Attention Deficit Disorder find Tillman's book to be a guide written just for them: it moves so quickly, is so simple and easy to follow, that there is no time to get bored, no time for the mind to wander. ADHD students who have never been able to make it through other fine training guides seem to relish Tillman's book from beginning to end. It's just plum FUN.
