## Customer Reviews

Was disappointed to see that many of the hairstyles in this book were the same as in Abby Smith's other book Ultimate Hairstyles. You only need one or the other-not both.

Great for Medium Length Hair I was hoping to find a few hairstyles that would work with my medium length hair. I was happily surprised to find that most of these hairstyles could be modified for my shorter hair. There are over 60 hairstyles in the book, so there are plenty of hairstyles that will work for you. The hairstyles are so pretty and it's definitely a nice change from my usual ponytail!

PERFECTION for quick and easy hair styles that make you look chic and on trend. So many other books make things difficult, but this has beautiful detailed photos and easily understandable instructions. I love looking in the book every morning because something new stands out to me when getting ready. I love that all of these hairstyles don't take me longer than 10 minutes! Sheer

happiness in a book!

Gorgeous pictures, clear tutorials. I just recently decided I would like to know how to do something more than just a ponytail with my hair, and this book is great.

I love this book. The steps are so easy and clear to follow. Very detailed and sweet! A perfect gift for all ages!

Bought this for my 12 year old niece for Christmas because she loves Katniss Everdeen and Katniss wore braids. My neice is still learning new styles from this book nearly a year later. Very good for blonds because you can really see the more intricate braiding.

This has good instructions with each style. I wasn't as frustrated trying them because she does remind you that it takes practice. I got it to try new things with my granddaughters hair, she doesn't have the patience to let me do her hair. But the hints that was given help me try new styles. Most of them aren't overly easy, unless you're a natural like my daughter is. But I am having fun playing around with different ones. I learned it's best to start at the beginning and master the earlier styles first then the others will go smother.

I don't see what others have seen. This is high quality and original. I have seen something else from this author and she's really cutting edge.
