Customer Reviews

This book is amazing! I am not a really big book reader, but this is not your typical book about keeping a house clean. Oh, no...this is packed FULL of recipes for just about everything you can imagine to clean in your home. The best part? The fact that you are using NO chemicals and making these all on your own. They are simple, inexpensive ways to clean. It takes a few minutes to

gather ingredients and make the cleaning recipe - much faster and cheaper than going to the store and buying it. I encourage everyone to get this to keep as a staple in their home. Have it handy to where you keep your cleaning supplies so you can get anything clean! See my full review here: [...]

I purchased this book because I wanted to get away from using so many chemical cleaners in my home. This book has an easy, natural formula for absolutely everything you could need to clean! Their version of 'Goo Gone' works better than the original from the store. I tested the natural version against the bottle of store bought that I had, and it worked 100% better, without the nasty petroleum smell. It's thorough and very easy to use. I HIGHLY recommend this book to anyone wanting more natural cleaning solutions.

I cannot put this book down; in fact I should be cleaning right now- but I had to let the WORLD KNOW how great you will feel inside if you start using the valuable advice given inside this book. It's not only valuable, it's also CHEAP! The cleaning recipes are from things you most likely own or can buy for a few dollars, and will last for a long time. More importantly, they are SAFE, they WORK, they are ORGANIC, and I like the fact that most of them SMELL GOOD. That last one is a choice by the user, however. Becky has solutions for everything you can think of and some I wish I had known a long time ago. For those of us who are cleaning challenged, she not offers non-toxic cleaning recipes for everything imaginable, but also includes a variety of cleaning routine checklists. "The Organically Clean Home" is a must have, not on my bookshelf, but in my hands!

I LOVE this book. Checked it out at the library, ordered it for me, then ordered it for 3 friends. Lost mine and then ordered it again! What I like about it is that there is a recipe for everything- want to clean your cabinets? There is a recipe that contains a little lemon oil so that your cabinets smell good and don't dry out. Toilets- super duper foaming cleaner. Anti- scum spray for the bathtub... Dog wipes, kid wipes, yeah, everything is in there. Also, my house has become so much more orderly and clean since I have been following the cleaning schedule that is laid out in this book- this is just what I needed to become more enthusiastic and have more pride in keeping up with a schedule.

I have tried numerous recipes in this book and have had successful results. I can't stop telling my friends and family about The Organically Clean Home. As a first time home buyer, I feel confident I can maintain my home thanks to Becky's cleaning checklists and recipes. I highly recommend this

Wow! I have bought and downloaded several books on organic and homemade cleaning products. All have been good but only have a few recipes or cover one or two areas such as laundry or kitchen etc. This book gives you the why's and benefits of using homemade organic products which just about every book does. Then it gives you tips on how to organize your cleaning so your not doing it all in one day like I tend to do. It gives you a list of cleaning tools to keep on hand and basic ingredients. There is a small list of essential oils and there uses (you can find a bigger list online) then there are tons of recipes throughout the book. Recipes for use in the kitchen, laundry, bathroom, bedrooms and living spaces, floors, nursery, playroom, garage, badement, and garden. There are checklists in the back of the book for weekly, monthly, daily cleaning, checklist for decluttering, one day clean, weekend clean, one week deep clean, 31 day cleaning plan, the deep cleaning checklist, pretreating stain removal guide, metric conversion chart and a section in the book to write notes. Also, most of the ingredients in the recipes can be bought at your local store or ordered online. I love this book!

This is a wonderful book! The cleaning formulas work really well, are fun to make and smell really great. You will learn how to clean your home with non toxic ingredients. The directions are easy to follow. This book will give you a great feeling of empowerment as you will know you are saving your health and the health of your family by not using toxic cleaning products.

This book is almost identical the the previously published book "Naturally Clean Home" by Karyn Siegel-Maier in 2008. Down to the cover photo, layout, and content. I am surprised this connection has not been made before now, and I do not respect the lack of originality.
