## Customer Reviews

The book contains 50 personal statements and not much else. The personal statements were not relevant to me or my friends. I did buy this book and others. I think the best ones were Insider's guide to med school admissions by Toyos and Princeton Review. Read this one in a bookstore and you will see it is not worth it.

I thought this book is by far the best and most honest review of medical school admissions. It also has great tips on how to do well once you have been accepted.

This is a pretty good book as it has 50 personal statements. But, this is most of the book's content and it is also dated. The admissions process is so complicated that you need a more comprehensive work. I have looked at all of the books on getting into medical school and the best one without any question is the Definitive Guide to Medical School Admission by the Goldsteins.

Most of the book is personal statements. I think it is fine to write something about the statements,

but the admissions process is too complicated and most of the book, in my view, should be devoted to the applications, secondaries, MCAT, picking the right schools, recommendations and interviews. There is a lot on the market. I would check out the other resources.

Worthless for med school admission. Here I'll give you all the info in the book: get good grades, do well on mcat, write a good essay. Most of the book is essays from successful applicants. Wouldn't recommend copying one for yourself so I can't see the reason for them being in there.
